

SADMAN ISHRAQ MOHIUDDIN

Senior Business Analyst | IT & Cloud Transformation | Requirements Engineering | Agile Delivery

Montreal, QC · +1-514-515-0189 · sadman.mohiuddin@gmail.com · [linkedin.com/in/sadmanishraqmohiuddin](https://www.linkedin.com/in/sadmanishraqmohiuddin) · sadmanishraqmohiuddin.vercel.app

PROFESSIONAL SUMMARY

Senior Business Analyst with 8+ years of progressive experience, actively advancing CCBA® certification (IIBA; exam target Dec 2026) and French proficiency for the Montreal market with an Engineering degree from Queen Mary University of London - leading enterprise technology delivery, requirements engineering and business transformation across cloud migration, fintech, government, healthcare, logistics and SaaS environments in Canada and internationally. Proven track record engaging executive, government & senior stakeholder groups; delivering structured BA artefacts for programmes impacting 30,000+ users; leading cross-functional teams through complex multi-workstream delivery and driving Agile delivery from discovery through UAT & business sign-off. Early career engineering experience at ExxonMobil (40+ global sites) spanning quantitative analysis, data-driven operational reporting & multi-million-dollar capital decision support brings the analytical rigour and technical precision that underpins strong business analysis practice.

SELECTED BA PROJECTS

- **Enterprise Cloud Transformation (AANNEX SOLUTION INC.)** - Microsoft 365, Azure migration, Oracle-to-Azure SQL, IAM, WAF, FinOps & enterprise architecture documentation for ~30,000-user financial institution.
- **National Fiscal Compliance Platform (Arbree)** - Led requirements management, API integration documentation & scope control for Bangladesh's national EFDMS rollout, coordinating across the National Board of Revenue (NBR), government implementation partner GENEX & 30,000+ retail BIN holders; produced iterative REST API integration specifications for third-party POS vendors & managed significant out-of-scope delivery across offline sync, encryption middleware & multi-Telco APN security requirements; platform designed to scale to 600,000+ devices.
- **Healthcare Logistics Platform (Arbree)** - Operational workflow design, KPI tracking, SQL/Power BI analytics, data capture & fulfilment optimization across 14,000+ completed orders.
- **Enterprise Systems Delivery (Arbree)** - Business analysis across healthcare ERP, CRM, IFRS AI RAG research agent, EV infrastructure network (Mercedes-Benz supply chain), logistics platforms and a custom-built EdTech LMS (educateU).

PROFESSIONAL EXPERIENCE

AANNEX SOLUTION INC

Senior Business Analyst

Oct 2025 - Present

Canada & Bangladesh (Remote)

- Lead end-to-end business analysis & requirements engineering for a large-scale enterprise cloud transformation at a major Canadian financial institution, supporting modernization initiatives impacting ~30,000 users.
- Conduct stakeholder discovery, requirements elicitation workshops & solution design sessions across cloud engineering, DevOps, infrastructure, cybersecurity, enterprise architecture & business teams.
- Perform AS-IS / TO-BE analysis, gap analysis & system impact assessments for migration of legacy Exchange environments to Microsoft 365 SaaS.
- Drive requirements for on-premises infrastructure migration to Microsoft Azure, including Oracle-to-Azure SQL transition, API integrations, data migration pathways & enterprise architecture documentation.
- Translate business needs into BRDs, functional specifications, user stories, acceptance criteria, process flows, decision logs & implementation-ready requirements; support Agile delivery through backlog refinement, sprint planning, UAT planning, defect triage & release coordination; partner with architecture & security teams to define IAM controls, WAF security requirements & FinOps governance models.

ARBREE LIMITED

Senior BA (2022-25) · BA & QA Lead (2020-22) · Business Analyst (2018-20) · Digital Solutions Analyst (2016-18) Bangladesh / Kuwait / UK (includes brief departure to Solargao Limited: Mar'20 - Aug'20)

Nov 2016 - Oct 2025

- Operated as lead sub-contractor BA on a Bangladesh Government national fiscal compliance programme - presenting business cases & solution recommendations directly to executive & government stakeholders, managing relationships & delivery oversight end-to-end across a programme scaling to 600,000+ devices.
- Delivered requirements engineering, requirements elicitation, AS-IS / TO-BE analysis, gap analysis, BPMN process mapping & solution design across 15+ enterprise platforms spanning government, AI, automotive, healthcare, fintech, EV infrastructure, logistics & e-commerce - producing BRDs, FRDs, PRDs, functional specifications, user stories, use cases, acceptance criteria, UML diagrams, SOP documentation & RACI matrices that drove engineering delivery at scale.
- Wrote SQL queries (SELECT, JOIN, aggregations, data cleaning) to validate system outputs & confirm functional requirement coverage; led Agile delivery (Scrum/Kanban) across sprint planning, backlog prioritization, cross-functional dependency management & release coordination.

- Led UAT planning, test case design, QA validation, defect tracking, issue triage & business sign-off across multiple parallel software initiatives simultaneously.
- Drove change management & stakeholder adoption across enterprise platform rollouts; mentored junior BAs on requirements elicitation, documentation standards & Agile delivery practices.

AAMAR PHARMA LIMITED

Jul 2022 - Jan 2024

Head of Operations & Business Analysis Lead (concurrent with Arbree)

Dhaka, Bangladesh

- Led platform operations, process design & analytics for a digital healthcare logistics platform, scaling to 14,000+ completed orders, ~\$150K cumulative revenue, ~70% customer retention & 43% average YoY revenue growth from 2021 to 2023.
- Managed a team of ~10 staff & a 40+ partner pharmacy network; authored & secured executive approval for business cases underpinning operational investment decisions; designed end-to-end workflows across order intake, prescription verification, pharmacy sourcing, dispatch coordination & last-mile delivery - scaling to 526+ active customers & 48% average YoY customer growth.
- Built Excel-based financial forecasting models using scenario analysis, sensitivity analysis, unit economics & pricing strategy to support operational & investment decisions; developed Power BI dashboards & SQL-driven KPI tracking across 23+ order data points per transaction enabling demand forecasting, logistics optimisation & performance reporting.
- Applied data-driven process optimisation & workflow redesign to achieve ~74-minute average delivery time (~18% faster than the 90-minute SLA); contributed to development of an Order Management System (OMS), B2C ordering platform & early B2B pharmacy integrations supporting platform scalability.

SOLARGAO LIMITED

Mar 2020 - Aug 2020

Engineering Team Lead

Dhaka, Bangladesh

- Led cross-functional stakeholder coordination across government agencies, community partners & the Asian Development Bank (ADB) for a national rural electrification programme; conducted gap analysis of rural energy access needs & applied ArcGIS geospatial analysis to support data-driven infrastructure planning across 247 solar sites, ~800 irrigation systems & 18+ MW of deployed infrastructure - directing a ~200-person field operations team through end-to-end delivery.

EXXONMOBIL CORPORATION

Sep 2015 – Sep 2016

Mechanical Engineer, Fixed Equipment

Kuala Lumpur, Malaysia

- Conducted quarterly operational performance, incident & reliability trend analysis across 40+ global refinery & chemical sites using Excel & Tableau, producing insights used to support multi-million-dollar operational & capital allocation decisions.
- Coordinated engineers across Asia, Europe & North America in a continuous 24-hour cross-functional workflow; delivered a major integrity analysis programme \$50K under a \$300K budget; contributed to a ~\$3M capital project defining technical requirements, operating conditions & standards documentation.

CORE SKILLS

Business Analysis: Requirements Engineering · Requirements Elicitation · Stakeholder Management · Business Requirements · Functional Requirements · Non-Functional Requirements · BRD · FRD · PRD · User Stories · Acceptance Criteria · Use Cases · Requirements Traceability Matrix

Process & Systems: AS-IS / TO-BE Analysis · Gap Analysis · BPMN Process Mapping · Workflow Design · Business Process Improvement · System Impact Assessment · SOP Documentation · RACI Matrix · Change Management · Cost-Benefit Analysis · Business Case Development

SDLC & Delivery: SDLC · Agile · Scrum · Kanban · Waterfall · Hybrid Delivery · Jira · Confluence · Sprint Planning · Backlog Prioritization · Release Planning · Defect Management · QA Coordination · UAT · Test Case Review

Data & Reporting: SQL · Power BI · Excel Advanced · KPI Tracking · Data Validation · Operational Analytics · Data Analysis · Tableau · Dashboarding · Financial Modelling

Technology: Microsoft 365 · Microsoft Azure · Azure SQL · Oracle · API Integrations · Data Migration · IAM · WAF · FinOps · SaaS · ERP · CRM · UML · Lucidchart · Microsoft Visio

EDUCATION & PUBLICATION

Queen Mary University of London | BEng (Hons), Aerospace Engineering | London, United Kingdom

Sep 2012 - Sep 2015

• Merit based University Scholarship - International Science & Engineering Excellence Award (full tenure)

Publication: ACM (Association for Computing Machinery): [A Fast Resource Efficient Method for Human Action Recognition](#)

CERTIFICATIONS & LANGUAGES

Certifications: CCBA® Preparation - IIBA | Exam Target: Dec 2026 · Google Data Analytics Professional Certificate · GDPR & Data Privacy Fundamentals · Fundamentals of Quantitative Modelling - Wharton Online · Python · Testing Training - ISTQB

Languages: English: Native/Bilingual · Bengali: Native/Bilingual · French: Elementary (MiFi Francisation L1-2, 16 hrs/week active study)
